Drug Discovery
Foundation**

Opportunities to Accelerate Funding for Drug Discovery and Development for Alzheimer's Disease, Cognitive Aging and Related Disorders

The ADDF is now considering financial assistance for relevant NIA and NINDS grant applications that were scored but not funded AND fall within the ADDF's current [funding priorities](#). Relevant NIH Funding Opportunity Announcements (FOAs) are listed below.

The ADDF will accept eligible applications on a rolling basis and will provide an expedited review, minimizing time and effort on the part of the investigator(s). To expedite the application process, eligible investigators may submit their NIA or NINDS applications and a copy of the study section review directly to the ADDF. In addition, NIA and NINDS staff will identify eligible investigators whose applications in response to the below-listed FOAs were scored but unfunded, and will notify them of this opportunity thrice yearly in conjunction with Institute funding decisions. The ADDF will attempt to support parts or all of applications that fall within the foundation's mission and [funding priorities](#).

Receiving interim funding by the ADDF will enable investigators to continue valuable research projects and obtain additional preliminary data to aid in future funding efforts.

Application Instructions:

1. Submit Letter of Intent on the [ADDF website](#): For "Response to RFP" select "NIH program"
2. If a proposal is invited, complete the fill-in fields and upload the full application PDF, including the summary statement from study section review, as "Body of Application." For all other required documents, upload a blank page.
3. All applications will receive an expedited review (less than 90 days) through the ADDF.
